## FRONTEND DEVELOPMENT

I am a frontend developer with full-stack training. I previously worked at Excede where I used various frontend frameworks and tools to build and maintain ecommerce sites, admin and account dashboards, and develop ecommerce SAAS software and component libraries. Primarily I have worked with Next.js and React using Typescript. I have very good experience using Storybook and documenting components.

My passion for tabletop games introduced me to the world of web app integration and drove me to learn how to code. Developing user interfaces with accessibility in mind, and building tangible solutions for data is where I am my happiest.

## KEY FRAMEWORKS + TECHNOLOGIES

React / Next.js	TypeScript	Ruby
Svelte	React Native	Rails
Vue	Storybook	PostgreSQL
Stencil.js	Tailwind	GraphQL
AWS	SASS	Firebase

## PROFESSIONAL EXPERIENCE

### Excede

Jul 2024 - Present

#### Frontend Developer

- Develop e-commerce platforms, enhancing user engagement and functionality.
- Collaborate with cross-functional teams, ensuring seamless design and development integration.
- Implement admin and account dashboards, improving data accessibility and user experience.
- Create newsletter modals and telemetry, optimising communication strategies.
- Conduct testing and research, driving continuous improvement and innovation.
- Implemented a component library, streamlining development processes and fostering consistency across multiple projects.
- Restructured company project management solutions, creating more efficient communication and visibility between cross-functional teams.

### Dijgtal

Feb 2022 - Feb 2024

#### Frontend Developer

- Develop frontend components using React, StencilJS, enhancing user interface efficiency.
- Create iOS/Android apps with React Native, improving cross-platform accessibility.
- Build static web pages with HTML, SASS, JavaScript, ensuring responsive design.
- Bundle, test, document libraries, enhancing code reliability and delivery readiness.
- Guide new developers, fostering skill growth and team collaboration.
- Engage with clients on project progress and managing client feedback.

## EDUCATION & CERTIFICATIONS

### Academy of Information Technology

Diploma of Information Technology

### TAFE NSW

Diploma of Sound Production

## EXTRACURRICULAR ACTIVITIES

### Tabletop Game Development and Testing

- Development and design of personal projects using Procreate and Tabletop Simulator.
- Chroma Arcana Testing
- Sorcerer: Endbringer Testing
